

Castor and glide sets for chairs

Bevco chairs are available with a range of high-quality casters and glides to suit different work environments and flooring types.

- Dual-Wheel Safety Casters: Feature load-sensitive brakes that activate when the chair is not in use, helping prevent unwanted movement and improving safety in the workplace.
- Soft Casters: Standard on most models, ideal for hard surfaces such as tile or concrete.
- Hard Casters: Designed for carpeted or soft floors, available upon request.
- Interval Braking Casters: These intelligent casters resist rolling when chair is unoccupied.

Chairs come with plastic glides.
